

Overview

The purpose of this guide is to get WINSelect Enterprise installed and running on your computer without any issues. It provides a reference for some common questions that arise when installing and using this software.

WINSelect Resources

User guides, video tutorials, white papers, and other documentation on WINSelect are available in the Faronics Content Library at <http://www.faronics.com/html/library.asp>.

What is WINSelect?

Controlling user activity on public use and kiosk computers is a problem that IT personnel continually face. IT administrators want a solution that allows them to easily manage user access to certain applications, web sites, and menu options so that they can influence how a workstation is used. Faronics WINSelect protects a computer's purpose by empowering administrators with full control over a workstation's abilities. Windows operating system features, Start menu functionality, Internet Explorer capabilities, and Windows Explorer options can all be heavily customized to suit organizational needs.

System Requirements

WINSelect Enterprise requires Windows 2000 SP4, Windows XP Professional SP2 or later (32-bit), or Windows Vista (32-bit), and Faronics Core Console. It is highly recommended that all components be installed using the Windows Administrator account.

Faronics Core Console requires 32- or 64-bit editions of Windows XP SP2, Windows Server 2003, or Windows Vista in addition to .NET 3.5, MMC 3.0, and any edition of Microsoft SQL Server 2005 or Microsoft SQL Server 2008 Express. It is highly recommended that all components be installed using the Windows Administrator account.

The .NET, MMC, and SQL Server Express components are freely downloadable from Microsoft, but are not redistributable by Faronics. However, the Faronics Core Console installer will detect which of the components are not installed and will automatically launch a web browser to the appropriate Microsoft page to download each component.

Installing WINSelect

To install WINSelect on a single computer, complete the following steps:

1. Double-click the file *WINSelect Loadin.exe* to begin the installation process.
2. Follow the steps presented, and read and accept the license agreement.
3. Click *Install* and the WINSelect Loadin is installed on the computer.

Once installed, WINSelect can be configured through Faronics Core Console.

The evaluation version of WINSelect is valid for 30 days. To upgrade to the full version of WINSelect enter a valid Licence Key in the space provided in the About node. If no Key is entered after 30 days WINSelect is disabled.

The WINSelect Enterprise User Guide is available at: http://www.faronics.com/doc/WSE_Manual.pdf

Free technical support is available to you during your evaluation period. Contact our Technical Support department at 800-943-6422 or through <http://www.faronics.com/html/support.asp>
